

ADAM17 Inhibitor Screening Assay Kit

Product Information

Cat.No.

Kit-0049

Product Overview

ADAM17 Inhibitor Screening Assay Kit is used for screening ADAM17 inhibitor.

Description

The TACE (tumor necrosis factor- α -converting enzyme), also called ADAM metallopeptidase domain 17 (ADAM17), is a 70-kDa enzyme that belongs to the ADAM protein family of disintegrins and metalloproteases. TACE is believed to be involved in the processing of tumor necrosis factor alpha (TNF- α) at the surface of the cell, and from within the intracellular membranes of the trans-Golgi network. This process, which is also known as "shedding", involves the cleavage and release of a soluble ectodomain from membrane-bound pro-proteins (such as pro-TNF- α), and is of known physiological importance. In ADAM17 Inhibitor Screening Assay Kit, TACE hydrolyzes the specific FRET substrate to release the quenched fluorescent group, which can be detected fluorometrically at $\text{Ex/Em} = 318/449$ nm. In the presence of the potent TACE inhibitor, the hydrolyzation of substrate will be impeded. The kit provides a rapid, simple, sensitive and reliable test suitable for high-throughput screening of TACE inhibitors and can be modified to check the relative TACE activity.

Target Species

Mammals

Usage

For research use only (RUO)

Storage

Store kit at -20°C , protected from light. Warm Assay Buffer to room temperature before use. Briefly centrifuge all small vials before opening. Read the entire protocol before performing the assay.

Kit Components

Assay Buffer. Cap code: WM. 25 mlSubstrate. Cap code: red. 0.2 mlTACE Enzyme (20 μg). Cap
