

## AKT total + Phospho S473 FLOW Kit

### Product Information

#### Cat.No.

Kit-0065

#### Product Overview

Akt is a serine, threonine protein kinase critical in cellular metabolism, glucose uptake, protein synthesis, cell proliferation, growth, apoptosis, survival, angiogenesis, migration and invasion. It acts downstream of the phosphatidylinositol 3 kinase (PI3K) and it mediates the effects of several growth factors such as platelet-derived growth factor, epidermal growth factor and insulin growth factor. It is activated by phosphorylation on Ser-473, Thr-308 and Tyr-474 and when active it phosphorylates transcription factors (FOXO1), kinases (GSK-3, Raf-1, ASK, Chk1) and other signaling proteins (Bad, MDM2). There are three Akt isoforms (Akt1, Akt2 and Akt3) which share 80% sequence identity also known as PKB $\alpha$ , PKB $\beta$ ; and PKB $\gamma$ . Akt has been shown to have a role in metabolism, apoptosis and proliferation and therefore it has been proposed to be the candidate "Warburg Kinase".

#### Size

50 tests

#### Applications

Flow Cytmore details

#### Target Species

Reacts with: Mouse, Human

#### Storage

Store at +4°C.

#### Kit Components

Components: 50 tests; 10X Phosphate Buffered Saline: 1 x 100ml; 400X Tween-20: 1 x 4ml; 50X Antibody cocktail: 1 x 110 $\mu$ l; Blocking Solution: 1 x 10ml

**Detection method** Fluorescent

#### Compatible Sample Types

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## **AKT total + Phospho S473 FLOW Kit**

Adherent cells, Suspension cells
