

Antioxidant Assay Kit

Product Information

Cat.No.

Kit-0099

Product Overview

Antioxidant Assay Kit is a quantitative colorimetric determination of total antioxidant capacity.

Description

An ANTIOXIDANT is a molecule capable of slowing or preventing the oxidation of other molecules. Antioxidants protect the cells from damages by reactive oxygen species which are produced in oxidation reactions in the cell. Antioxidants can be small molecules such as glutathione, vitamins, or macromolecules such as catalase, glutathione peroxidase. As oxidative stress contributes to the development of many diseases including Alzheimer's disease, Parkinson's disease, diabetes, rheumatoid arthritis and neurodegeneration, the use of antioxidants in pharmacology is intensively studied. Antioxidants are also widely used as dietary supplements and in industry as preservatives in food, cosmetics, rubber and gasoline.

Applications

Direct Assays: serum, plasma, urine, saliva and other biological samples, food and beverages. Drug Discovery/Pharmacology: effects of drugs on TAC.

Usage

For research use only (RUO)

Storage

Store Reagent A at room temperature and other components at -20°C. Shelf life of six months after receipt.

Kit Components

Reagent A 12 mL Reagent B 1 mL Standard: 50 mM Trolox 100 µL

Detection method Colorimetric

Compatible Sample Types

CREATIVE **BIOMART**[®]
Assay Kit

Antioxidant Assay Kit

Beverage, Biological Sample, Food, Plasma, Serum, Saliva, Urine

Features & Benefits

Sensitive and accurate: Use 20 μ L sample. Linear detection range from 1.5 to 1000 μ M Trolox equivalents. Simple and high-throughput: The procedure involves addition of a single working reagent and incubation for 10 min. Can be readily automated as a high-throughput assay for thousands of samples per day.
