

## GZMB Activity Fluorometric Assay Kit

### Product Information

#### Cat.No.

Kit-0403

### Product Overview

GZMB Activity Assay Kit (Fluorometric) is used for measuring granzyme B activity using fluorometric methods.

### Description

Granzyme B (GZMB, EC number 3.4.21.79) also known as Granzyme-2 is a serine protease stored in the granules of activated cytotoxic T cells and NK cells. Upon target cell contact, Granzyme B is directionally exocytosed and with the assistance of perforin enters the target cell. With its unique substrate specificity (Granzyme B prefers an aspartic acid residue at the P1 site of its substrates), Granzyme B processes and activates various pro-caspases thereby inducing apoptosis in the target cell. In GZMB Activity Assay Kit (Fluorometric), we have utilized a peptide substrate containing the Granzyme B recognition sequence along with a fluorescent label "AFC". Granzyme B catalyzes the cleavage of this substrate and releases the AFC molecule, which can be detected fluorometrically (Ex/Em = 380/500 nm). This Assay Kit is rapid, reliable and sensitive and can detect Granzyme B activity in various biological samples.

### Applications

Measurement of Granzyme B activity in various biological samples or purified Granzyme B activity. Study & characterize Granzyme B inhibitors.

### Usage

For research use only (RUO)

### Storage

Store kit at -20°C, protected from light. Warm Assay Buffer to room temperature before use. Briefly centrifuge small vials prior to opening.

## GZMB Activity Fluorometric Assay Kit

Granzyme B Assay Buffer 25 ml  
Granzyme B Substrate 0.5 ml  
Positive control (Granzyme B Enzyme, human recombinant) 1 vial  
AFC Standard (1 mM) 0.1 ml

**Detection method** Fluorometric

**Compatible Sample Types**

Biological samples
