

Lactulose Fluorometric Assay Kit

Product Information

Cat.No.

Kit-0501

Product Overview

Lactulose Assay Kit (Fluorometric) is used to measure Lactulose.

Description

Lactulose is a synthetic disaccharide composed of galactose and fructose. It is closely related to lactose which is a disaccharide consisting of galactose and glucose. Since Lactulose is not absorbed by the gut; it is therefore used as a laxative and for hepatic encephalopathy and is considered a prebiotic. It is detectable in heated milk since it is easily formed by isomerization of lactose at elevated temperatures or in alkaline solutions. Significant background is observed in traditional assays where glucose formed from the fructose is used to measure the lactulose concentration in the samples. The Lactulose Assay Kit (Fluorometric) provides a simple, sensitive, & convenient assay to measure Lactulose. In this kit, fructose is directly measured using Lactulose Enzyme Mix after hydrolysis of Lactulose into galactose and fructose. The linear range of the assay is between approximately 10 pmol and 1 nmol.

Applications

Determination of lactulose.

Usage

For research use only (RUO)

Storage

Store kit at -20°C.

Kit Components

Lactulose Hydrolysis Buffer 25 mL
Hydrolysis Enzyme Mix (Lyophilized) 1 vial
Lactulose Reaction Buffer 25 mL
Lactulose Enzyme Mix (Lyophilized) 1 vial
PicoProbe 300 μ L
Enhancement Solution 1.5 mL
Lactulose Standard (100 mM) 80 μ L

CREATIVE **BIOMART**[®]
Assay Kit

Lactulose Fluorometric Assay Kit

Detection method Fluorometric

Compatible Sample Types

Dairy products, Foods, Pharmaceuticals
