

Matrix Metalloproteinase-8 (MMP-8) fluorometric drug discovery Kit

Product Information

Cat.No.

Kit-0584

Product Overview

A QuantiZyme Assay System. The MMP-8 Fluorometric (also known as fluorimetric) Drug Discovery Kit is a complete assay system designed to screen inhibitors of matrix metalloproteinase-8 (MMP-8, neutrophil collagenase, collagenase-2) using a quenched fluorogenic peptide: OMNIMMP fluorogenic substrate Mca-Pro-Leu-Gly-Leu-Dpa-Ala-Arg-NH₂. Mca fluorescence is quenched by the Dpa group until cleavage by MMPs at the Gly-Leu bond separates the two moieties. The assays are performed in a convenient 96-well microplate format. Also included are active enzyme, a prototypic control inhibitor (NNGH₃), and a detailed instruction booklet.

Size

96 wells

Applications

Fluorescence microscopy, HTS

Storage

-80°C

Kit Components

MMP-8 enzyme (human) (recombinant), substrate, calibration standard, inhibitor, assay buffer, 96-well white microplate.
