

SREBP-2 Translocation Assay Kit (Cell-Based)

Product Information

Cat.No.

Kit-0803

Product Overview

SREBP-2 Translocation Assay Kit (Cell-Based) provides a highly specific SREBP-2 primary antibody together with a DyLight conjugated secondary antibody in a ready to use format. Also included as a positive control is a cholesterol trafficking inhibitor, U-18666A, which has been shown to activate SREBP-2 translocation into nuclei.

Size

96 tests

Applications

Functional Studies, ICC/IF more details

Target Species

Reacts with: Mouse, Human; Predicted to work with: all Mammals

Kit Components

Components: 96 tests; Cell-Based Assay Blocking Solution: 1 vial; Cell-Based Assay Fixative: 1 vial; Cell-Based Assay SREBP-2 Primary Antibody: 1 vial; Cell-Based Assay U-18666A: 1 vial; DyLight 549 Conjugated Goat Anti-Rabbit Secondary Antibody: 1 vial

Compatible Sample Types

Adherent cells
