

Trypsin Activity Assay Kit

Product Information

Cat.No.

Kit-0835

Product Overview

Trypsin Activity Assay Kit is use for measuring trypsin activity using fluorometric methods.

Description

Trypsin (EC 3.4.21.4) is a serine protease found in the digestive system of many vertebrates, where it hydrolyses proteins. Trypsin is produced in the pancreas as the inactive proenzyme trypsinogen. Active trypsin predominantly cleaves peptide chains at the carboxyl side of the amino acids lysine or arginine, except when either is followed by proline. It is used for numerous biotechnological processes. In the assay, trypsin cleaves a substrate to generate p-nitroaniline (p-NA) which is detected at $\lambda=405\text{nm}$. Since the color intensity is proportional to p-NA content, trypsin activity can be accurately measured. The kit detects 10-100 mU (p-NA unit) trypsin in various samples.

Target Species

Mammals

Usage

For research use only (RUO)

Storage

Store the kit at -20°C.

Kit Components

Trypsin Assay Buffer 25 mL Trypsin Substrate (in DMSO) 200 μL Positive Control (Lyophilized) 1 vial p-NA Standard (2 mM) 400 μL Trypsin Inhibitor (TLCK, 20 mM) 100 μL Chymotrypsin Inhibitor (TPCK, 10 mM) 100 μL

Detection method

 Colorimetric

Compatible Sample Types

Tel: 1-631-559-9269 1-516-512-3133

Fax: 1-631-938-8127
