CREATIVE BIOMART®
Assay Kit

Urea Assay Kit

Product Information

Cat.No.

Kit-0837

Product Overview

Urea Assay Kit is a quantitative colorimetric urea determination.

Description

Urea is primarily produced in the liver and secreted by the kidneys. Urea is the major end product of protein catabolism in animals. It is the primary vehicle for removal of toxic ammonia from the body. Urea determination is very useful for the medical clinician to assess kidney function of patients. In general, increased urea levels are associated with nephritis, renal ischemia, urinary tract obstruction, and certain extrarenal diseases, e.g., congestive heart failure, liver diseases and diabetes. Decreased levels indicate acute hepatic insufficiency or may result from over-vigorous parenteral fluid therapy.

Applications

Direct Assays: urea in serum, plasma, urine, milk, cell/tissue culture, bronchoalveolar lavage (BAL) etc.Drug Discovery/Pharmacology: effects of drugs on urea metabolism.Environment: urea determination in waste water, soil etc.

Usage

For research use only (RUO)

Storage

Store all components at 2-8°C. For long-term storage, keep standard at -20°C.Shelf life: 12 months after receipt.

Kit Components

Reagent A 12 mLReagent B 12 mLUrea Standard (50 mg/dL) 0.5 mL

Detection method Colorimetric

Compatible Sample Types

Tel: 1-631-559-9269 1-516-512-3133

CREATIVE BIOMART®
Assay Kit

Urea Assay Kit

Bronchoalveolar Lavage Fluid, Cell Culture, Milk, Plasma, Serum, Tissue Culture, Urine

Features & Benefits

Sensitive and accurate. Use 5 μL samples. Linear detection range 0.08 mg/dL (13 μM) to 100 mg/dL (17 mM) urea in 96-well plate assay.Simple and high-throughput. The procedure involves addition of a single working reagent and incubation for 20 min. Can be readily automated as a high-throughput assay for thousands of samples per day.Improved reagent stability and versatility. The optimized formulation has greatly enhanced reagent and signal stability. Cuvet or 96-well plate assay.Low interference in biological samples. No pretreatments are needed. Assays can be directly performed on raw biological samples i.e., in the presence of lipid and protein.
