

## CREBBP TR-FRET Assay Kit

### Product Information

#### **Cat.No.**

Kit-1711

#### **Size**

384 Reactions

#### **Description**

The CREBBP TR-FRET Assay Kit is designed to measure the inhibition of CREBBP binding to its substrate in a homogeneous 384 reaction format. This FRET-based assay requires no time-consuming washing steps, making it especially suitable for high throughput screening applications. The assay procedure is straightforward and simple; a sample containing terbium-labeled donor, dye-labeled acceptor, CREBBP, substrate, and an inhibitor is incubated for sixty minutes. Then, the fluorescence intensity is measured using a fluorescence reader.

#### **Applications**

Great for screening small molecular inhibitors for drug discovery and HTS applications.

#### **Storage**

At least 6 months from date of receipt when stored as directed. Kit components require different storage conditions. Be sure to store each component at the proper temperature upon arrival.
