

## TAF1L (BD2) Inhibitor Screening Assay Kit

### Product Information

---

**Cat.No.**

Kit-1876

---

**Size**

384 reactions

---

**Description**

The TAF1L (BD2) Inhibitor Screening Assay Kit is designed to measure the inhibition of TAF1L binding to its substrate. The key to the assay kit is specific binding of the TAF1L bromodomain 2 (a.a. 1517-1649) to the acetylated histone substrate. With this kit, only three simple steps on a microtiter plate are required. First, a sample containing TAF1L and an inhibitor of choice is incubated with the biotinylated substrate for thirty minutes. Next, acceptor beads are added, then donor beads, followed by reading the Alpha-counts.

---

**Applications**

Useful for the study of bromodomain binding assays, screening bromodomain inhibitors and selectivity profiling.

---

**Storage**

At least 12 months from date of receipt, when stored as directed. Kit components require different storage conditions. Be sure to store each component at the proper temperature upon arrival.
