

# **SET7/9 Methyltransferase Inhibitor Screening Assay Kit**

## **Product Information**

### **Cat.No.**

Kit-2021

### **Description**

SET7/9 is an MT that acts on various substrates including histone 3 at lysine residue 4 (H3K4), p53, and the transcription factor TAF 10. In the SET7/9 MT Inhibitor Screening Assay the transfer of the methyl group from SAM by SET7/9 to the acceptor peptide (TAF 10) generates SAH, which is rapidly converted to urate and H<sub>2</sub>O<sub>2</sub> using an enzyme mixture provided in the kit. A subsequent reaction between H<sub>2</sub>O<sub>2</sub> and ADHP produces the highly fluorescent compound resorufin.
