

## Free Glycerol Fluorometric Assay Kit

### Product Information

#### Cat

Kit-2248

#### Cat.No.

Kit-2248

### Product Overview

Glycerol is a central component for synthesis of all lipids; it acts as a backbone for triglycerides and phospholipids, which plays an important role for cell membrane's structure. Due to its low toxicity, glycerol is widely used in pharmaceutical, food and cosmetic industries. Free Glycerol Fluorometric Assay kit is simple, sensitive and easy to use. This assay is suitable for measuring trace amount of glycerol in samples, which contain reducing substances that may interfere with oxidase-based assays. In the assay, glycerol reacts with Enzyme Mix to form an intermediate, which is subsequently oxidized with the production of fluorescence. The fluorescence intensity is directly proportional to the amount of glycerol. This assay kit can detect glycerol amount less than 40 pmol.

### Applications

Measurement of glycerol in various tissues/cells.

Analysis of lipid metabolism  
Mechanistic study of cardiovascular diseases.

### Storage

-20°C

### Shipping

Gel Pack

### Size

100 assays

### Kit Components

Glycerol Assay Buffer; (in DMSO); Glycerol Enzyme Mix (Lyophilized); Glycerol Developer (Lyophilized);  
Glycerol Standard (100 mM)

CREATIVE **BIOMART**<sup>®</sup>  
Assay Kit

## Free Glycerol Fluorometric Assay Kit

**Detection method** Fluorescence (Ex/Em = 535/587 nm)

---

### Features & Benefits

---

Simple, highly sensitive, and easy to use.; This assay kit can detect glycerol amount less than 40 pmol.
