

## Caspase-3 Immunoassay Kit (Fluorometric)

### Product Information

#### **Cat**

Kit-2305

#### **Cat.No.**

Kit-2305

### Product Overview

Activation of caspase-3 plays a key role in initiation of cellular events during apoptosis. The CaspSELECT; Caspase-3 Immunoassay Kit provides an effective immunosorbent enzyme assay for specific, quantitative detection of caspase-3 activity in microtiter plates. The assay utilizes caspase-3 polyclonal antibody to capture activated caspase-3 from cell lysates. Caspase substrate DEVD-AFC is then added and is cleaved proportionally to the amount of activated caspase-3 in the cell lysate. The cleavage generates free AFC which can be analyzed fluorometrically (Ex./Em. = 400 nm/505 nm) using a fluorescence plate reader. The assay ensures absolute specific detection of caspase-3. Other known caspases and non-specific proteases are not detected.

### Applications

Effective immunosorbent enzyme assay for specific, quantitative detection of caspase-3 activity in microtiter plates.

#### **Storage**

-20°C

#### **Shipping**

Gel Pack

#### **Size**

100 assays

### Kit Components

Cell Lysis Buffer; Coating Buffer; Anti-Caspase-3 Antibody (20X); Blocking Buffer; Incubation Buffer; DTT (1 M); DEVD-AFC Substrate (1 mM); Positive Control (rh-Caspase-3); Microtiter Plate; Adhesive

## Caspase-3 Immunoassay Kit (Fluorometric)

Plate Cover

---

**Target Species**

---

Mammalian

---

**Detection method** Fluorescence(Ex/Em 370-425/ 490-525nm)

---

**Features & Benefits**

---

Simple one-step procedure; takes only ~3 hours; Fast and convenient

---
