

## Nitric Oxide Synthase Assay Kit

### Product Information

#### **Cat**

Kit-2457

#### **Cat.No.**

Kit-2457

### Product Overview

Nitric oxide (NO) is a reactive radical that plays an important role in many key physiological functions. NO, an oxidation product of arginine by nitric oxide synthase (NOS), is involved in host defense and development, activation of regulatory proteins and direct covalent interaction with functional biomolecules. Simple, direct and non-radioactive procedures for measuring NOS are becoming popular in Research and Drug Discovery. Nitric Oxide Synthase Assay Kit involves two steps: a NOS reaction step during which NO is produced followed by an NO detection step. Since the NO generated by NOS is rapidly oxidized to nitrite and nitrate, the NO production is measured following reduction of nitrate to nitrite using an improved Griess method. The procedure is simple and the time required for sample pretreatment and assay is reduced to as short as 40 min.

#### **Storage**

4, -20°C

#### **Shipping**

On Ice

#### **Size**

100 tests

**Detection method** OD540nm

#### **Compatible Sample Types**

Biological

#### **Features & Benefits**

Tel: 1-631-559-9269 1-516-512-3133

Fax:1-631-938-8127

## Nitric Oxide Synthase Assay Kit

Sensitive and accurate. Detection range 0.25 - 25 U/L in 96-well plate.

Rapid and reliable. Can be completed in 40 min if reduction of NO<sub>3</sub><sup>-</sup> to NO<sub>2</sub><sup>-</sup> is performed at 60°C.
