

## Triglyceride Assay Kit

### Product Information

**Cat**

Kit-2479

**Cat.No.**

Kit-2479

### Product Overview

Triglyceride, also known as Triacyl triglyceride or Triacyl-glyceride, is the main constituent in vegetable oil and animal fats. Triglycerides play an important role as energy sources and transporters of dietary fat. In the human body, high levels of triglycerides in the bloodstream have been linked to atherosclerosis, heart disease and pancreatitis. Simple, direct and automation-ready procedures for measuring triglyceride concentrations find wide applications in research and drug discovery. Triglyceride assay uses a single Working Reagent that combines triglyceride hydrolysis and glycerol determination in one step, in which a dye reagent is oxidized to form a colored product. The color intensity at 570nm is directly proportional to triglyceride concentration in the sample.

**Storage**

4, -20°C

**Shipping**

On Ice

**Size**

200 tests

**Detection method** OD570nm

**Compatible Sample Types**

Serum, plasma etc

**Features & Benefits**

Sensitive and accurate. Use as little as 10 µL samples. Linear detection range 0.01 to 1.0 mmol/L

## Triglyceride Assay Kit

(0.88 to 88.5 mg/dL) triglyceride.

Simple and convenient. The procedure involves addition of a single working reagent and incubation for 30 min at room temperature, compatible for HTS assays. Improved reagent stability. The optimized formulation has greatly enhanced the reagent and signal stability.

---

### Assay time

30 min

---

### Sensitivity

0.01 mmol/L (0.88 mg/dL)

---
