

Bovine Lumpy Skin Disease Virus Antibody Detection Kit

Product Information

Product Overview

Virus Antibody Detection Kits

Description

Designed for the detection of antibodies against Lumpy Skin Disease Virus (LSDV) in cattle serum or plasma.

Size

48t/96t

Applications

- Screening cattle herds for LSDV exposure
 - Monitoring vaccination outcomes
 - Disease management in endemic or high-risk areas
-

Features & Benefits

- Excellent sensitivity and specificity for LSDV
 - Robust performance in field and lab settings
 - Suitable for large-scale herd testing
 - Reduces risks of economic loss through early detection
-
