

## Cellulase (CL) Activity Assay Kit

### Product Information

---

#### Product Overview

---

The Cellulase (CL) Activity Assay Kit provides a simple and reliable method for measuring cellulase activity in microbial, plant, or industrial enzyme samples. Cellulase catalyzes the hydrolysis of cellulose into reducing sugars, which are quantitatively detected by a colorimetric reaction. This kit is ideal for applications in biomass conversion, fermentation research, and enzyme characterization.

---

#### Size

---

50t/24s

---

#### Storage

---

Store at 2–8 °C. Shelf life: 6 months.

---

**Detection method** Spectrophotometer
